1. Introduction

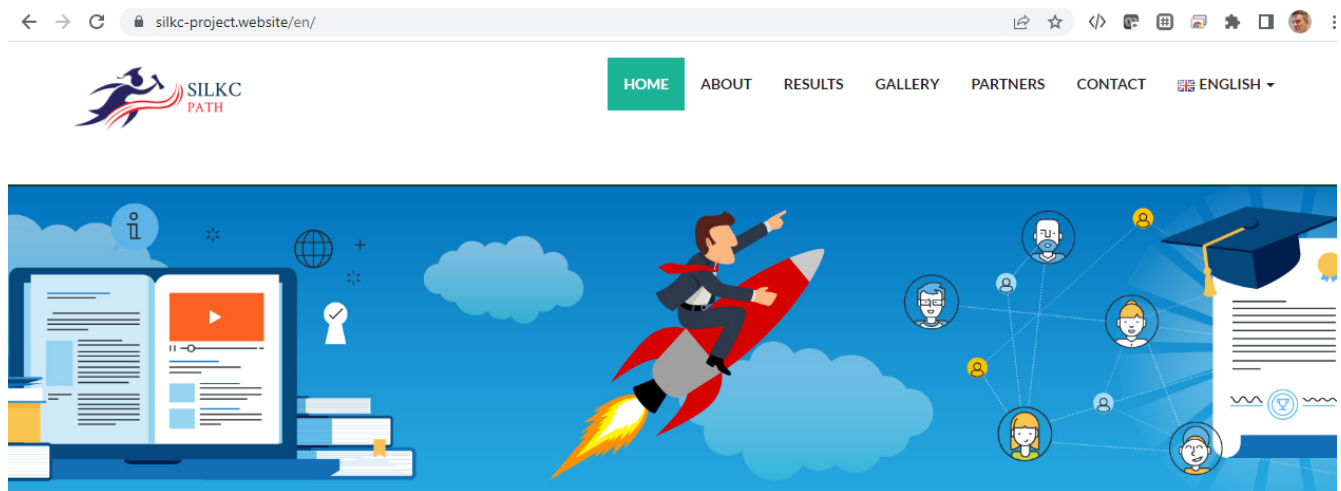

The main goal of SILKC PATH is to provide all stakeholders with an efficient tool to be integrated in the current solutions and policies as a complementary solution for better screening and supporting individuals in their career and learning pathway. The learning institutions will be highly involved in the project in order to provide all the formal data about the learning opportunities, statistics information about their learners' experience 1, 2 or 3 years after their graduation and their network of companies and institutions that can ease policy uptake of the solution towards its integration in larger strategies.

The SILKC project direct final beneficiary is any European citizen who wants to start or continue his study according to his training background and his targeted position.
